

## Test Cases

1. Let **"Ed Brown"** book a cab given the following details:

**Customer's name:** *Ed Brown*

**Address:** *3 Cecilia Close, London, N2 0UT*

**Destination:** *19 Layfield Crescent, London, NW4 3UJ*

**Date:** 15 Nov 2018 **Time:** 10.45 am

**\*Distance can be assumed as 4 miles if Web Services is not used.**

2. Create an invoice for **"Ed Brown"** - showing incurred cost and VAT for a total cost.
3. Let **"John Smith"** log in the system as a driver with the following registration and password: **"AK52VZV"**, **"JohnSmith"** and create a Session lasting for 20 minutes.
4. Prepare a list of jobs for **"John Smith"**
5. List all drivers and all customers registered for the **head office**
6. Prepare a daily report (including the turnover, and the number of customers served)
7. List all customers served per day including the destinations and the charge incurred.
8. Add **"Raj Kumar"** as a driver to the list with registration of **"GT65 TRA"** and setup a password.
9. Remove **"Mehmet Aydin"** from drivers list
10. Increase the price for short distances up to 5 miles by £2.
